

☁ Today's challenge

It is commonly accepted that a large proportion of technology is not required across the business. The challenge has always been how do you find what is not required, and then how to rationalise, consolidate and remove costs without placing the business at risk.

Our engagement not only provides you the auditable data to address this, but also leaves you with an ongoing solution that will continue to support you through continued visibility utilising automation and analytic capabilities.

Once operational the benefits continue, allowing informed decisions to be made around; cloud adoption, tracking SaaS usage, datacentre and software rationalisation.

This differs from standard SAM or ITAM tools as we monitor actual end user usage rather than simply what is installed or running, giving you **who** is using **what** technology, **when** and **how**.

☁ Delivered value

- Typically 20-30% IT Opex reduction
- Data in conjunction with automation drives an alignment between Finance and IT
- Clients generally realise immediate value and savings at the pilot stage
- Post pilot and UAT to full operational deployment takes between 3-6 months
- All engagements are managed, deployed and monitored centrally
- Right sizing against historic over provisioning of servers drives significant quick wins
- Ageing and unsupported technology is often identified, removing cyber threats to the business

☁ Positive outcome

Auditable 90-day usage of Oracle

- Follow the sun concurrent licence models typically reduces requirements by 53% whilst driving operational efficiencies on how the business operates

Auditable 90-day usage of Adobe Acrobat

- 36.84% have not used the software that is installed
- 67.40% have auditable data showing they only need "read only" capability
- 72.32% of Adobe installed is not required in its current form

Auditable 90-day usage of Microsoft Project

- 49.46% have not used the software that is installed
- 44.81% have auditable data showing they only need "read only" capability
- 71.54% of Project installed is not required in its current form
